Registration as an investment adviser does not imply a certain level of skill or training.

Version Date: 3/25/2026

Item 2: Material Changes

Form ADV Part 2 requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

Since the Firm's last annual updating amendment dated March 28, 2025, the Firm has the following material changes to report:

- Item 1: Cover Page- Change of Business Address
- Item 8: Methods of analysis, Investment Strategies, and Risk of Loss- Added description and risks related to investing in Structured Products.
- Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading- Enhanced our disclosure regarding Diazo's fiduciary duty to clients to provide additional explanatory detail; this change is descriptive only and does not reflect a change in our practices.
- Item 13: Review of Accounts- Updated custodial reports frequency of delivery.

Item 4: Advisory Business

A. Description of the Advisory Firm

DIAZO, LLC (hereinafter "DIAZO") is a Limited Liability Company organized in the State of Nevada. The firm was formed in November 2022, and the principal owner is Laura-Marie Long.

B. Types of Advisory Services

Portfolio Management Services

DIAZO offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. DIAZO creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels) and then constructs a plan to aid in the selection of a portfolio that matches each client's specific situation. Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

DIAZO evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. DIAZO will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

DIAZO seeks to ensure that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of DIAZO's economic, investment or other financial interests. To meet its fiduciary obligations, DIAZO attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, DIAZO's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is DIAZO's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent among its clients on a fair and equitable basis over time.

Financial Planning

Financial plans and financial planning may include but are not limited to investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

In offering financial planning, a conflict exists between the interests of the investment adviser and the interests of the client. The client is under no obligation to act upon the investment adviser's recommendation, and, if the client elects to act on any of the recommendations, the client is under no obligation to affect the transaction through the investment adviser. This statement is required by California Code of Regulations, 10 CCR Section 260.235.2.

Services Limited to Specific Types of Investments

DIAZO generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), insurance products including annuities, equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities, and private placements. DIAZO may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

DIAZO will tailor a program for each individual client. This will include an interview session to get to know the client's specific needs and requirements as well as a plan that will be executed by DIAZO on behalf of the client. DIAZO may use model allocations together with a specific set of recommendations for each client based on their personal restrictions, needs, and targets. Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent DIAZO from properly servicing the client account, or if the restrictions would require DIAZO to deviate from its standard suite of services, DIAZO reserves the right to end the relationship.

Through thorough financial planning we establish risk tolerances and an actualized risk based upon the client's time horizon and financial needs. We also utilize Nitrogen to determine the client's risk bands.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees and transaction costs. DIAZO does not participate in wrap fee programs.

E. Assets Under Management

DIAZO has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$ 221,570,863	\$ 0.00	December 2025

Item 5: Fees and Compensation

A. Fee Schedule

Lower fees for comparable services may be available from other sources.

Portfolio Management Fees

Total Assets Under Management	Annual Fees
\$0 - \$999,999	1.40%
\$1,000,000 - \$2,999,999	1.10%
\$3,000,000 - AND UP	0.90%

DIAZO uses an average of the daily balance in the client's account throughout the billing period, after taking into account deposits and withdrawals, for the purpose of determining the market value of the assets upon which the advisory fee is based.

These fees are generally negotiable, and the final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of DIAZO's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 5 days' written notice.

Financial Planning Fees

Fixed Fees

The negotiated fixed rate for creating client financial plans is between \$1,000 and \$5,000.

Clients may terminate the agreement without penalty, for a full refund of DIAZO's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in arrears.

Payment of Financial Planning Fees

Financial planning fees are paid via wire.

Fixed financial planning fees are paid in arrears upon completion.

C. Client Responsibility for Third Party Fees

Clients are responsible for the payment of all third-party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by DIAZO. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

DIAZO collects its fees in arrears. It does not collect fees in advance.

E. Outside Compensation for the Sale of Securities to Clients

Neither DIAZO nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

DIAZO does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

DIAZO generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is no account minimum for any of DIAZO's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

DIAZO's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. DIAZO uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data, primarily price and volume.

Investment Strategies

DIAZO uses long term trading, short term trading, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long

and short-term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

DIAZO's use of margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long-term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long-term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

DIAZO's use of margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best-known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting

(extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF’s shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt

and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Structured Products are securities derived from another asset, such as a security or a basket of securities, an index, a commodity, a debt issuance, or a foreign currency. Structured products frequently limit the upside participation in the reference asset. Structured products are senior unsecured debt of the issuing bank and subject to the credit risk associated with that issuer. This credit risk exists whether or not the investment held in the account offers principal protection. The creditworthiness of the issuer does not affect or enhance the likely performance of the investment other than the ability of the issuer to meet its obligations. Any payments due at maturity are dependent on the issuer’s ability to pay. In addition, the trading price of the security in the secondary market, if there is one, may be adversely impacted if the issuer’s credit rating is downgraded. Some structured products offer full protection of the principal invested, others offer only partial or no protection. Investors may be sacrificing a higher yield to obtain the principal guarantee. In addition, the principal guarantee relates to nominal principal and does not offer inflation protection. An investor in a structured product never has a claim on the underlying investment, whether a security, zero coupon bond, or option. There may be little or no secondary market for the securities and information regarding independent market pricing for the

securities may be limited. This is true even if the product has a ticker symbol or has been approved for listing on an exchange. Tax treatment of structured products may be different from other investments held in the account (e.g., income may be taxed as ordinary income even though payment is not received until maturity). Structured CDs that are insured by the FDIC are subject to applicable FDIC limits.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither DIAZO nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither DIAZO nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Certain Investment Adviser Representatives are also licensed as an insurance agents where they may sell insurance products. From time to time, they will offer Clients products and/or services in

this capacity. This represents a conflict of interest because it gives an incentive to recommend products and services based on the fees or commission received. This conflict is mitigated by disclosures, procedures, and the firm's Fiduciary obligation. Clients have the option to purchase these products or services through another insurance agent or investment advisor of their choosing.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

DIAZO does not utilize nor select third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

DIAZO has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. DIAZO's Code of Ethics is available free upon request to any client or prospective client.

According to law, an investment advisor is considered a fiduciary. As a fiduciary, it is an investment advisor's responsibility to provide fair and full disclosure of all material facts. In addition, an investment advisor has a duty of utmost good faith to act solely in the best interest of each of its clients. Diazo and its representatives have a fiduciary duty to all clients. Diazo and its representatives' fiduciary duty to clients is considered the core underlying principle for the Firm's Code of Ethics and represents the expected basis for all representatives' dealings with clients. We have the responsibility to ensure that the interests of clients are placed ahead of it or its representatives' own investment interest. All representatives will conduct business in an honest, ethical, and fair manner. All representatives will comply with all federal and state securities laws at all times. Full disclosure of all material facts and potential conflicts of interest will be provided to clients prior to services being conducted. All representatives have a responsibility to avoid circumstances that might negatively affect or appear to affect the representatives' duty of complete loyalty to their clients.

B. Recommendations Involving Material Financial Interests

DIAZO does not recommend that clients buy or sell any security in which a related person to DIAZO or DIAZO has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of DIAZO may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of DIAZO to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. DIAZO will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of DIAZO may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of DIAZO to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, DIAZO will never engage in trading that operates to the client's disadvantage if representatives of DIAZO buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on DIAZO's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and DIAZO may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in DIAZO's research efforts. DIAZO will never charge a premium or commission on transactions beyond the actual cost imposed by the broker-dealer/custodian.

DIAZO recommends Schwab Institutional, a division of Charles Schwab & Co., Inc.

1. Research and Other Soft-Dollar Benefits

DIAZO has access to research, products, or other services from its broker/dealer in connection with client securities transactions ("soft dollar benefits") consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended, and may consider these benefits in recommending brokers. There can be no assurance that any particular client will benefit from any

particular soft dollar research or other benefits. DIAZO benefits by not having to produce or pay for the research, products or services, and DIAZO will have an incentive to recommend a broker dealer based on receiving research or services. Clients should be aware that DIAZO's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

DIAZO receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

DIAZO may permit clients to direct it to execute transactions through a specified broker-dealer. If a client directs brokerage, then the client will be required to acknowledge in writing that the client's direction with respect to the use of brokers supersedes any authority granted to DIAZO to select brokers; this direction may result in higher commissions, which may result in a disparity between free and directed accounts; the client may be unable to participate in block trades (unless DIAZO is able to engage in "step outs"); and trades for the client and other directed accounts may be executed after trades for free accounts, which may result in less favorable prices, particularly for illiquid securities or during volatile market conditions. Not all investment advisers allow their clients to direct brokerage.

B. Aggregating (Block) Trading for Multiple Client Accounts

If DIAZO buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, DIAZO would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. DIAZO would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

DIAZO regularly reviews and evaluates client accounts for compliance with regards to clients' respective investment policies and risk tolerance levels. Such reviews are conducted by the Chief Operations Officer and Chief Compliance Officer and shall occur at least once per calendar year.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by the Chief Operations Officer. Financial planning clients are provided with a one-time financial plan concerning their financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in a client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, DIAZO's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client of DIAZO's advisory services provided on an ongoing basis will receive at least quarterly a report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. DIAZO will also provide at least quarterly a separate written statement to the client.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

DIAZO does not receive any economic benefit, directly or indirectly from any third party for advice rendered to DIAZO's clients.

With respect to Schwab, DIAZO receives access to Schwab's institutional trading and custody services, which are typically not available to Schwab retail investors. These services generally are available to independent investment advisers on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the adviser's clients' assets are maintained in accounts at Schwab Advisor Services. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment. For DIAZO client accounts maintained in its custody, Schwab generally does not charge separately for custody services but is compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through Schwab or that settle into Schwab accounts.

Schwab also makes available to DIAZO other products and services that benefit DIAZO but may not benefit its clients' accounts. These benefits may include national, regional or DIAZO specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of DIAZO by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist DIAZO in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts, if applicable), provide research, pricing information and other market data, facilitate payment of DIAZO's fees from its clients' accounts (if applicable), and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of DIAZO's accounts. Schwab Advisor Services also makes available to DIAZO other services intended to help DIAZO manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance, and marketing. In addition, Schwab may make available, arrange and/or pay

vendors for these types of services rendered to DIAZO by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to DIAZO. DIAZO is independently owned and operated and not affiliated with Schwab.

B. Compensation to Non – Advisory Personnel for Client Referrals

DIAZO does provide compensation, directly or indirectly to any third party for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, DIAZO will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Custody is also disclosed in Form ADV because Diazo has authority to transfer money from Client account(s), which constitutes a standing letter or authorization (SLOA). Accordingly, we will follow the safeguards specified by the SEC rather than undergo an annual audit.

Item 16: Investment Discretion

DIAZO provides discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. When investment discretion has been granted, DIAZO generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share. In some instances, DIAZO's discretionary authority in making these determinations may be limited by conditions imposed by a client (in investment guidelines or objectives, or client instructions otherwise provided to DIAZO).

Item 17: Voting Client Securities (Proxy Voting)

DIAZO will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

DIAZO neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither DIAZO nor its management has any financial condition that is likely to reasonably impair DIAZO's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

DIAZO has not been the subject of a bankruptcy petition in the last ten years.
